SUMMARY

As a highly motivated and results-driven Frontend Developer, I thrive on creating intuitive, user-friendly interfaces that deliver seamless experiences. With a strong background in Computer Engineering, I possess a deep expertise in Frontend Development and a passion for staying up to date on the latest technological advancements and innovative techniques.

My professional focus revolves around understanding and meeting the unique needs of businesses. By crafting creative solutions and continuously testing and refining them, I am able to deliver end results that consistently exceed expectations. I consistently provided value to the organizations I worked with.

Through collaboration with cross-functional teams, I was able to achieve incredible results, such as dramatic improvements in website performance and positive feedback from satisfied customers.

EXPERIENCE

Frontend Developer | January 2023 - Present

Consolidated Hallmark Insurance | Lagos, Nigeria

Projects

- Did a complete website revamp of the company's subsidiary, Gave it a face lift from the look and feel and also extended features to make it an e-commerce enabled wordpress website using javascript and integrating with paystack for payment option. This boosted the work efficiency of the staffs to focus more on other task and made transaction seamless
- Research and Development for implementing a chatbot-live agent solution to cater for the customers support and give the support team more flexibility to focus on non-repetitive tasks which helps the business to create a smooth customer experience
- Contributing to change request to a (React Js) project developed to book travel insurance, conditionally tweaking the styles for a good user interface and user experience for a better use case of the business
- Built a website that serves as the channel for API Documentation using VueJs

Technical Support | Intern

February 2022 - October 2022

Solar Creed | Ibadan, Nigeria.

- Got status reports and maintained all the desktops/laptops
- Provided solutions to any desktop/laptop that ran into a problem
- Worked closely with the technical head to install the company's solar power system
- Assisted in maintaining the installation pattern
- Developed a single web application customized to send bulk emails from the company's sales department to reach more potential customers.

WordPress Developer | Volunteering

May 2022 - June 2022

LearnHall LLC | Portland, USA

- Optimized images to increase time on page and updated layouts to meet usability and performance requirements
- Worked cooperatively with client services, sales and design team in a deadline-driven environment.
- Leveraged a strong understanding of WordPress core to manipulate admin and theme components.
- Functioned with a team of established and experienced software engineers, and UI/UX designers to create a website that connects teachers and students for easy virtual learning.
- Suggested an idea that helped with the thinkific platform
